

Appfolio Pitch (APPF): The Second Act

Joseph Blumberg

Residential Property Management Software (Core SaaS TAM)

Year 2020 = \$4,038 (CAGR = 8.3%) - Sales to 100% and includes other

Sources: NARAC & Grand View Research; Standard T&B and CAGR derived from filings

VAS Share vs Revenue per Unit (RPV)

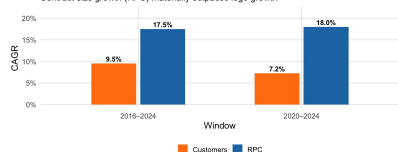

Shows Revenue Per Unit is strongly correlated with VAS Share

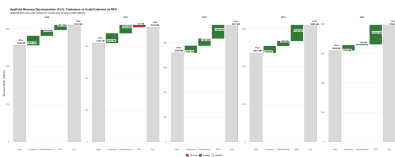

Sources: AppFolio 10-Ks (revenue), earnings releases (units), VAS share from filings

CAGR Comparison: RPC vs. Customer Count

Contract size growth (RPC) materially outpaces logo growth

Sources: AppFolio 10-Ks (2016-2024)

Sources: Company 10-K reports (2015-2024)

Property Management Customers (10-K's 2015-2024) with Logistic Fit

Blue = actuals; Green = logistic regression; Red triangles = forecasts (2025-2030)

Revenue per Customer (RPC) Has Risen Sharply

Labels show dollars per customer

Sources: AppFolio 10-K filings, 2016-2024

AppFolio Operating Margin (GAAP), 2016-2024

Operating margin = Operating income ÷ Revenue

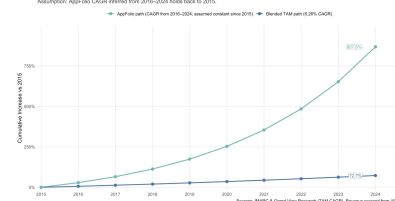

Sources: AppFolio 10-Ks. Includes SBC and all GAAP operating expenses

Increased Growth vs 2015 (2015 = 0% increase)

Each series shows 1% = 2020/2015 sales in Year = 2015

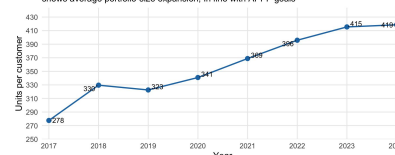

Assumption: AppFolio CAGR inferred from 2016-2024 units back to 2015

Sources: NARAC & Grand View Research; TAM CAGR, Revenue scaled from TAM

Units per Customer (2017-2024)

shows average portfolio-size expansion; In line with APPF goals

Sources: AppFolio filings & earnings releases (units) and 10-Ks (customers)

AppFolio S&M% and G&A% of Revenue (2016-2024)

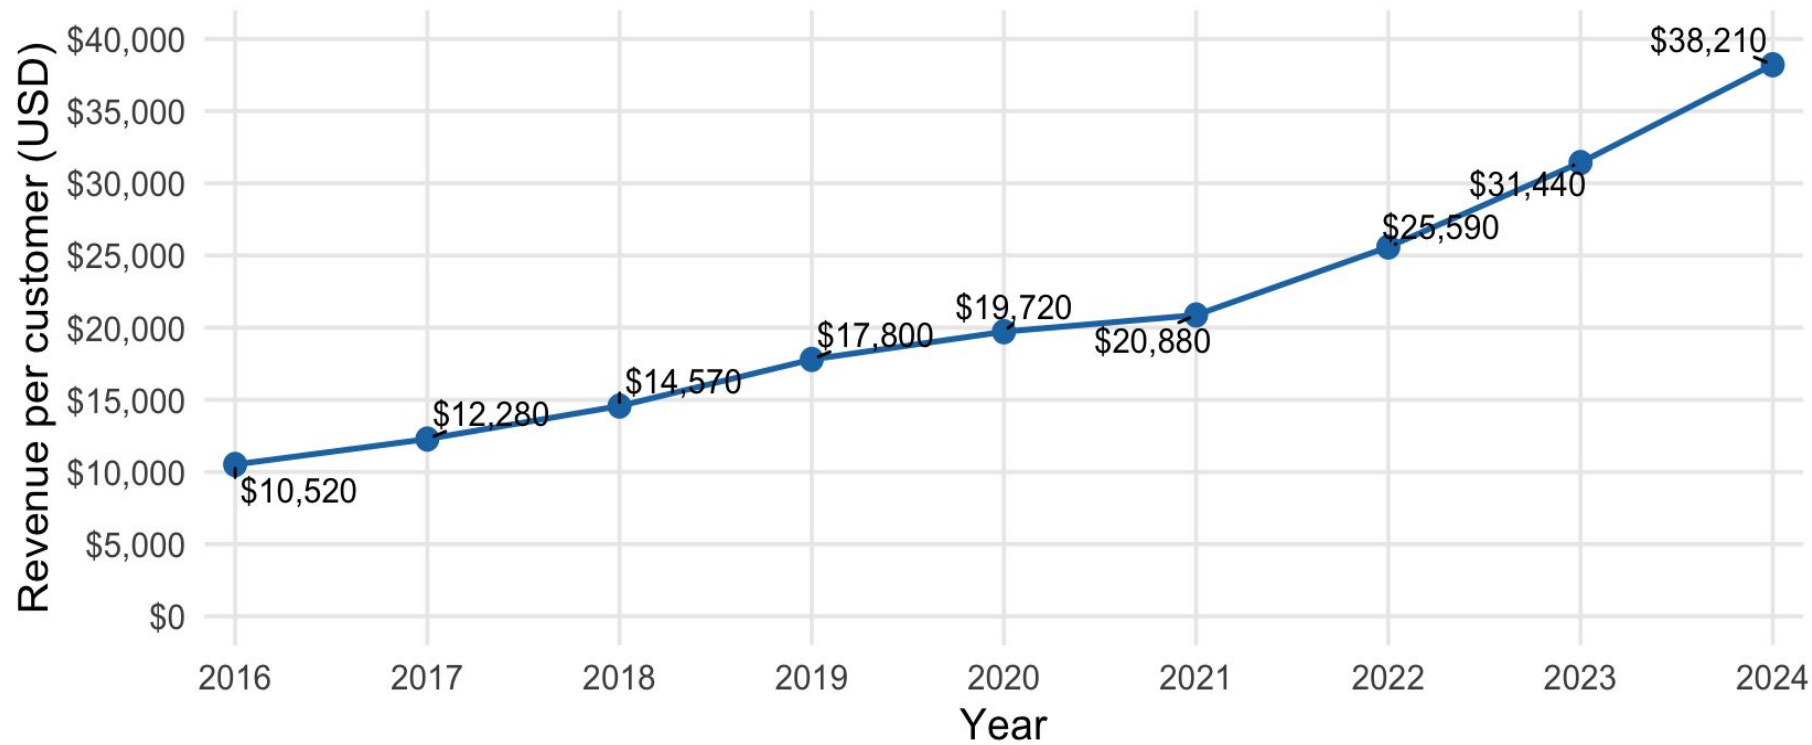

Overhead peaked during 2022's build-out

Sources: AppFolio 10-Ks (Operating expenses by line item)

Revenue per Customer (RPC) Has Risen Sharply

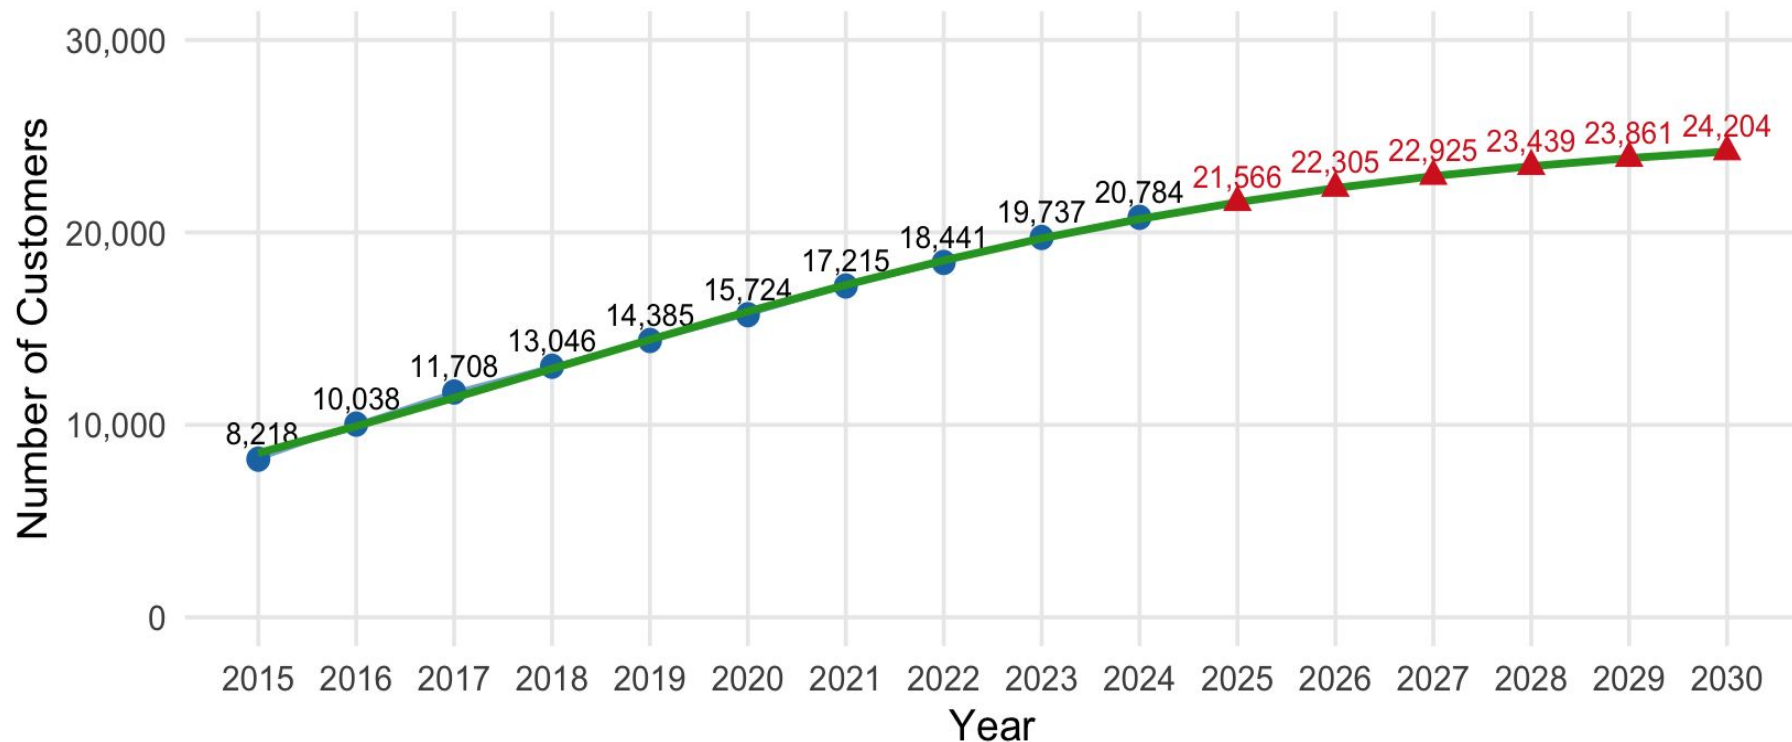

Labels show dollars per customer

Source: AppFolio 10-K filings, 2016–2024

Property Management Customers (10-K's 2015–2024) with Logistic Fit

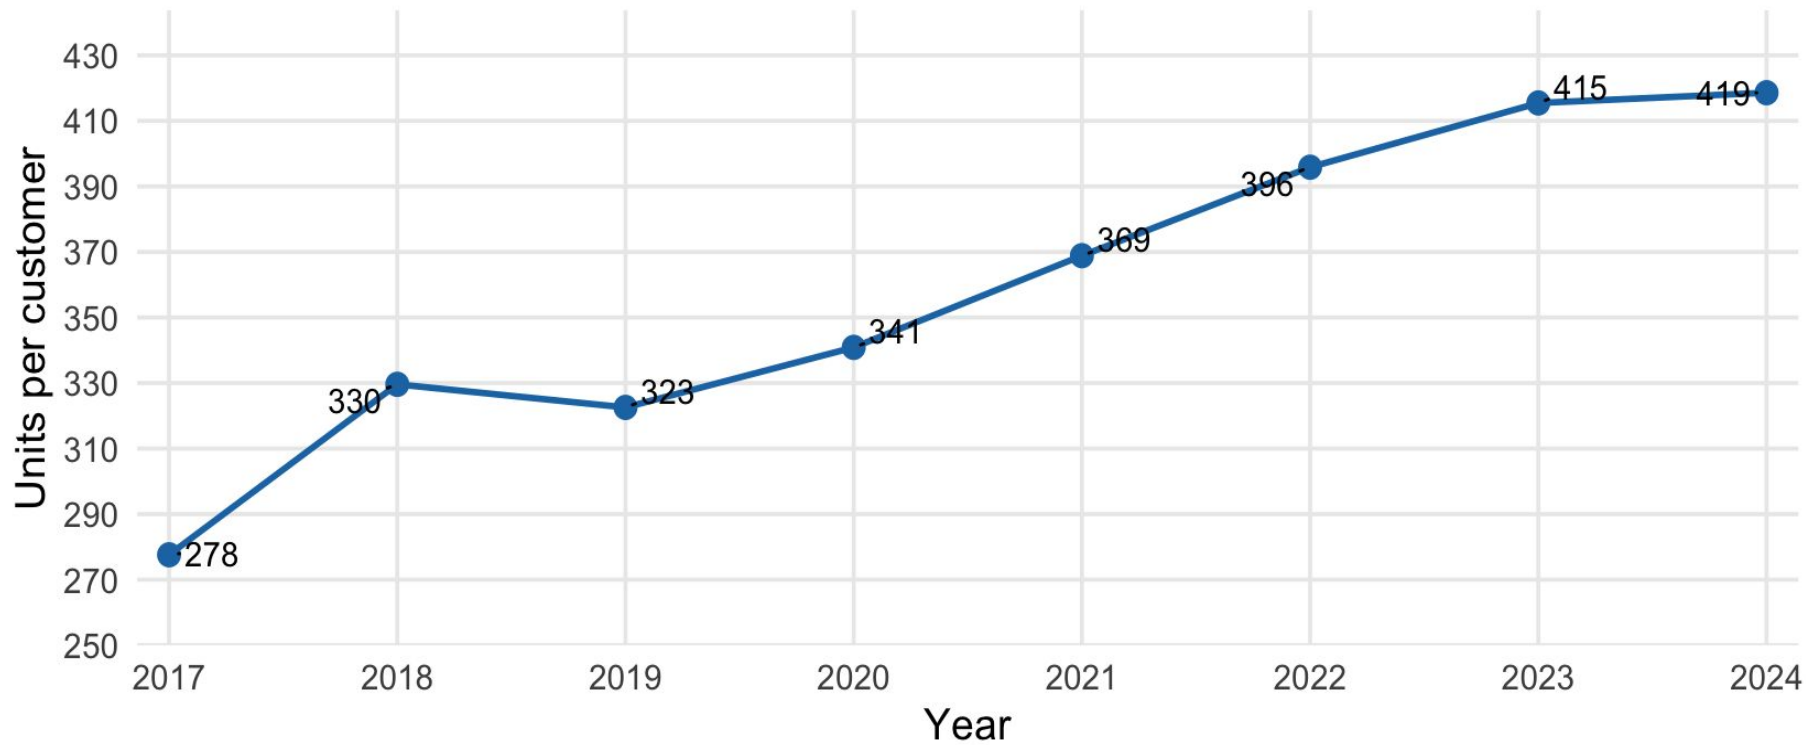

Blue = actuals; Green = logistic regression; Red triangles = forecasts (2025–2030)

Source: Company 10-K reports (2015–2024).

Units per Customer (2017–2024)

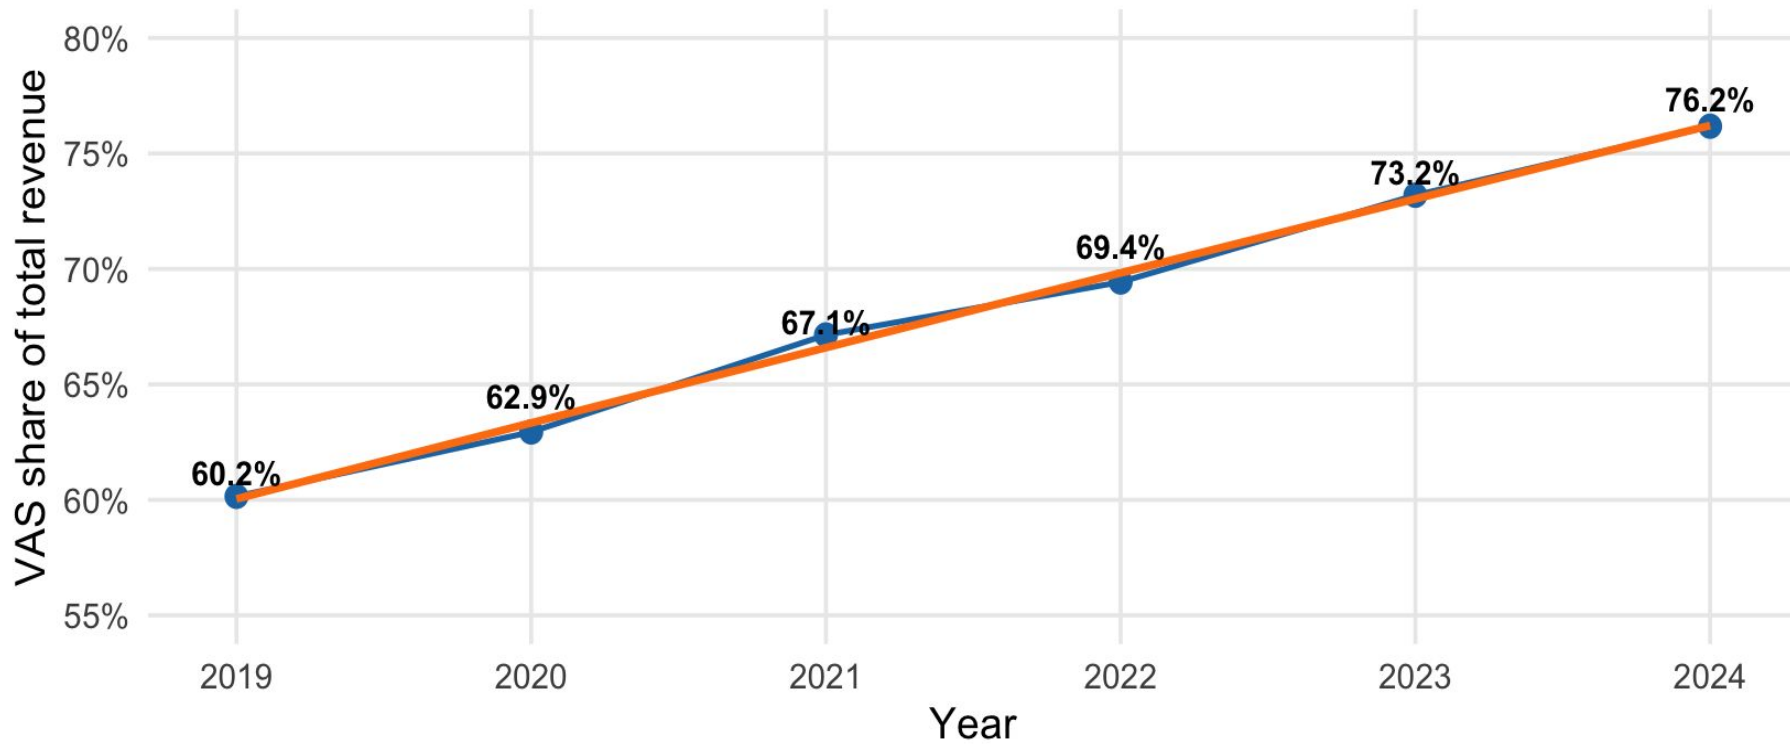

shows average portfolio-size expansion; In line with APPF goals

Sources: AppFolio filings & earnings releases (units) and 10-Ks (customers).

Value Added Services as % of Total Revenue

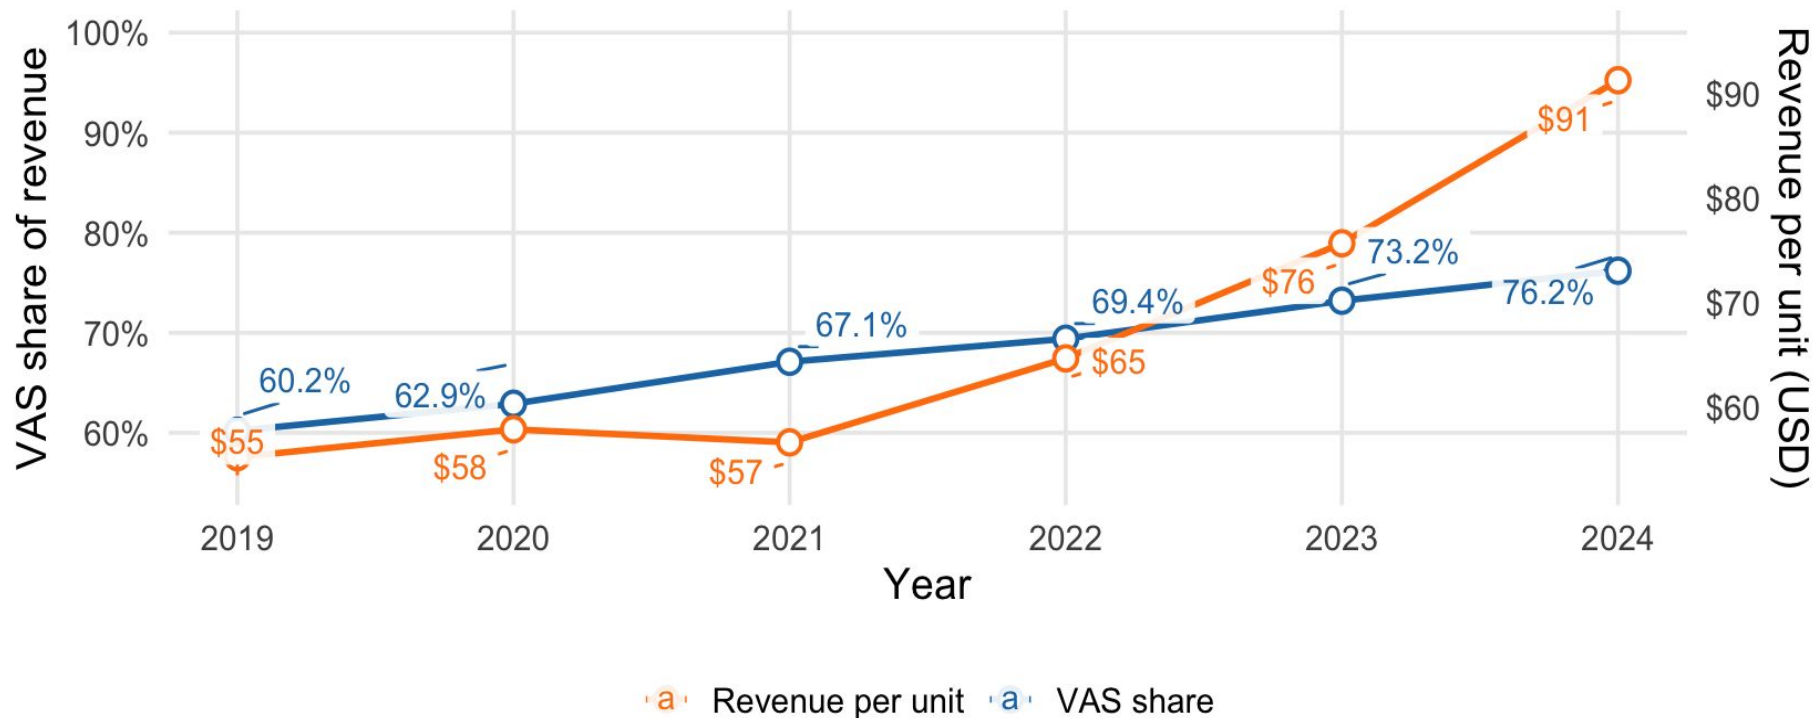

Exponential regression curve

Source: AppFolio 10-K filings, 2019–2024

VAS Share vs Revenue per Unit (RPU)

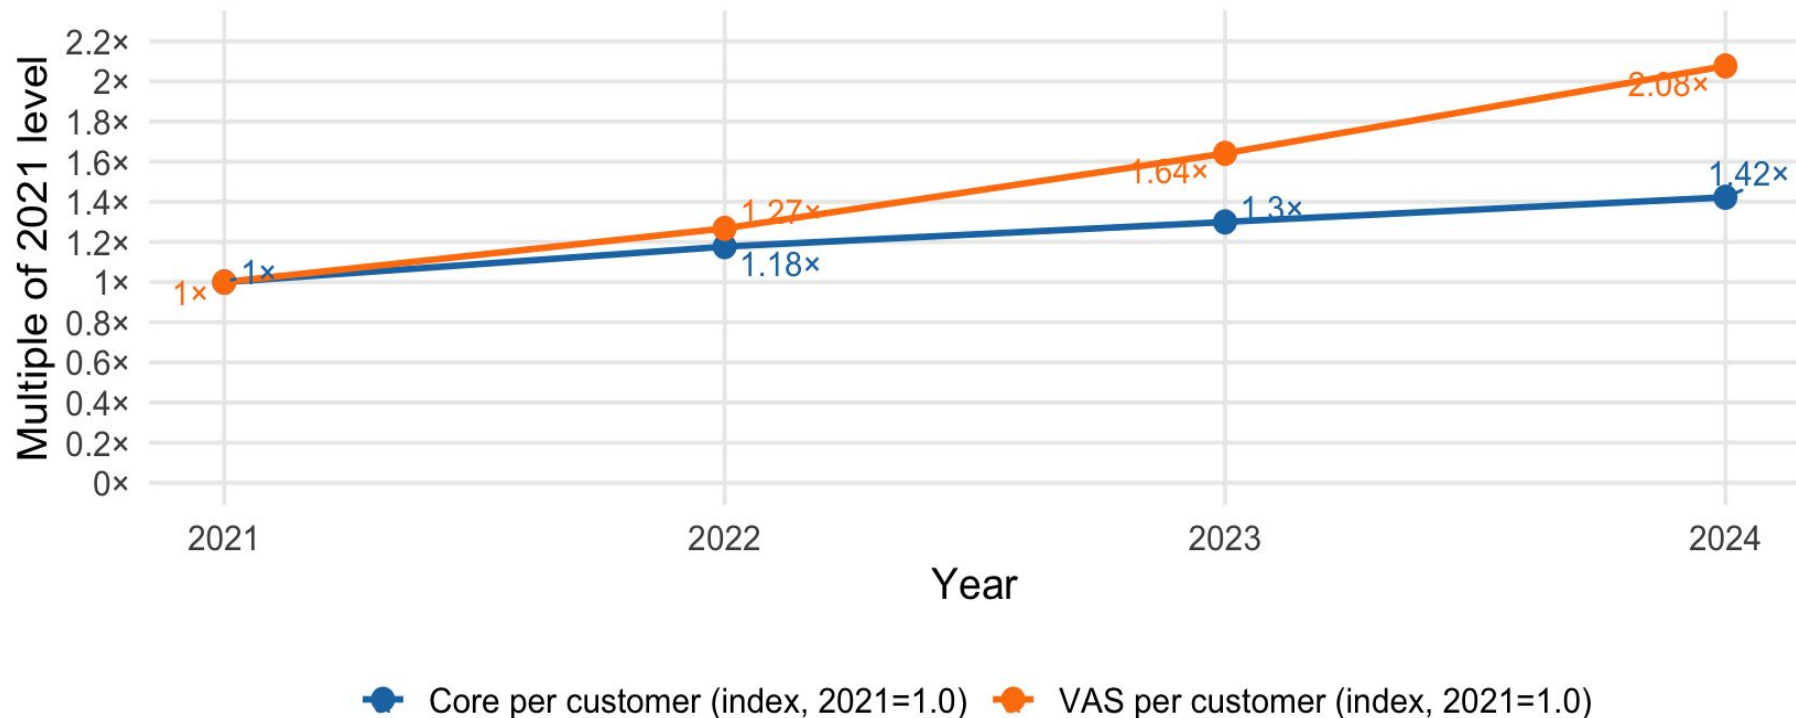

Shows Revenue Per Unit is strongly correlated with VAS Share

Sources: AppFolio 10-Ks (revenue), earnings releases (units), VAS share from filings.

Per-Customer Monetization Index (2021 = 1.0)

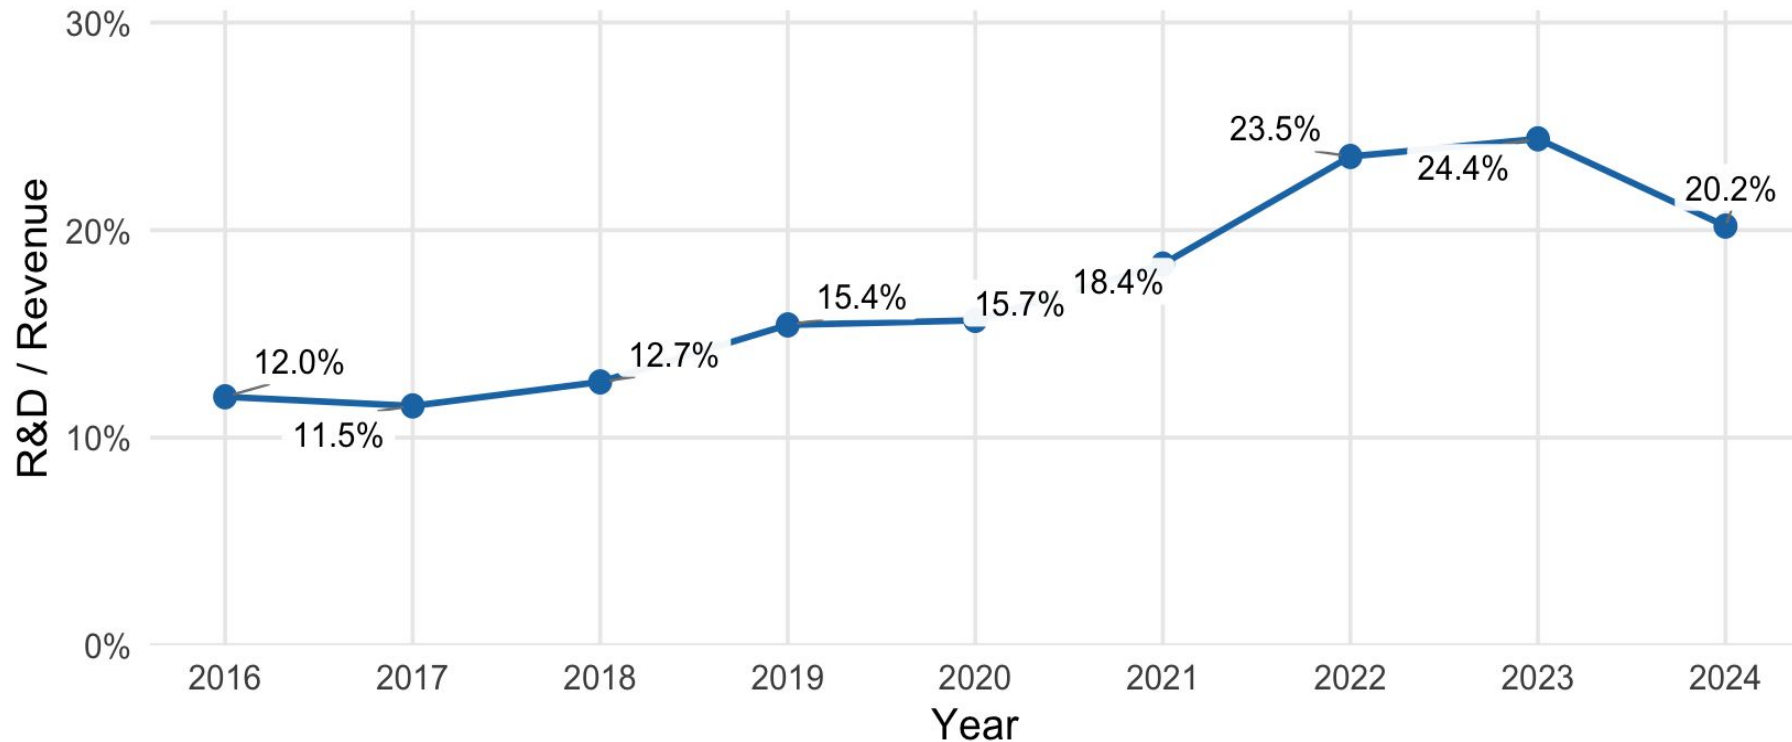

VAS/customer has scaled faster than Core/customer since 2021

Source: AppFolio 10-Ks 2021–2024 (segment revenue) & customer counts.

AppFolio R&D as a % of Revenue (2016–2024)

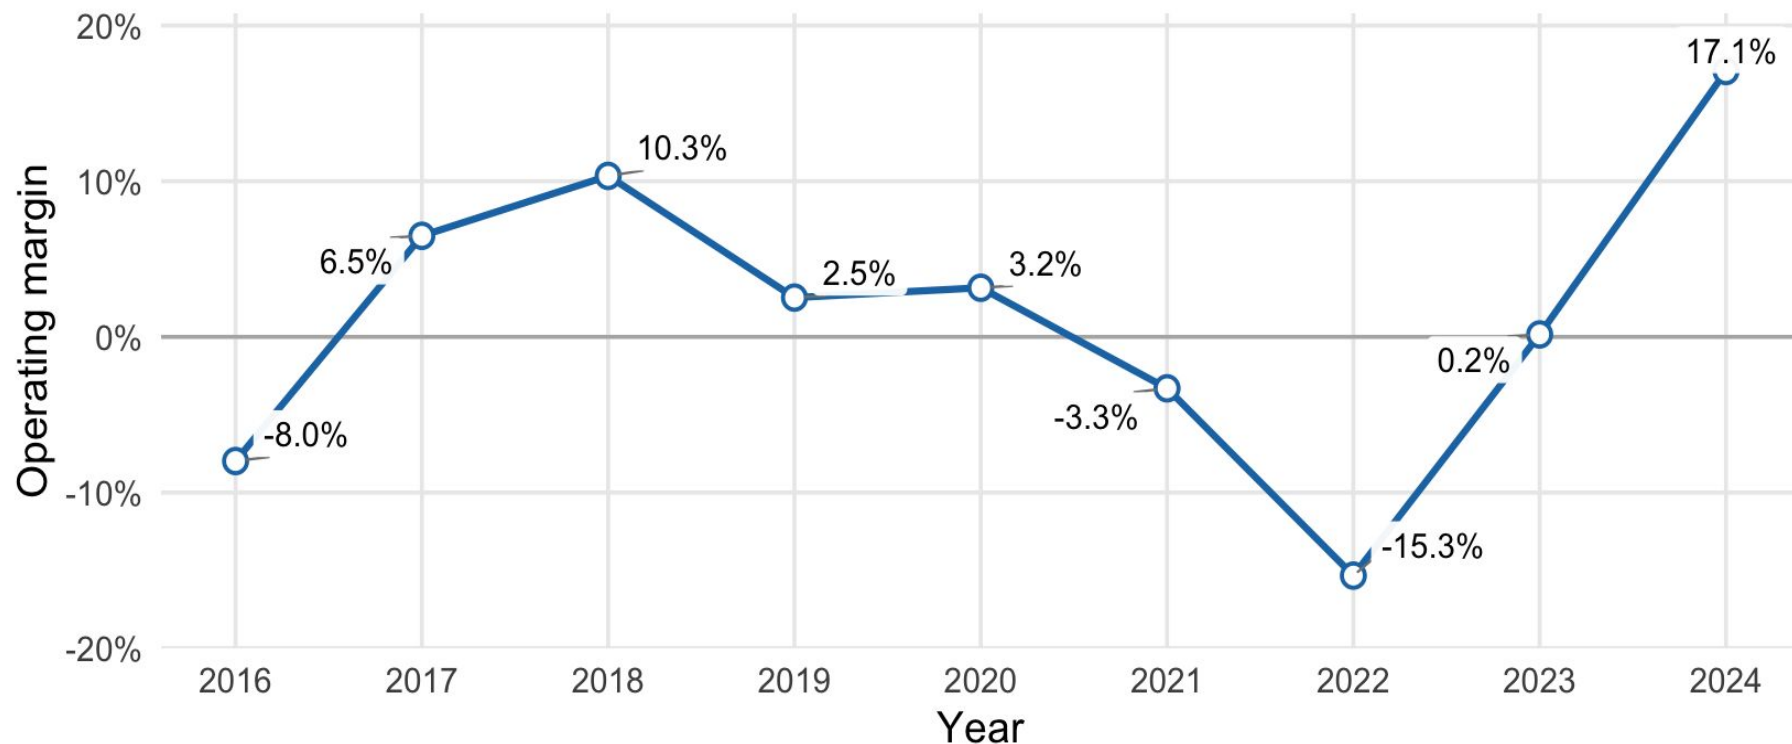

Elevated investment in owned technology (Realm, APIs, platform depth)

Source: AppFolio 10-Ks; figures include stock-based compensation.

AppFolio Operating Margin (GAAP), 2016–2024

Operating margin = Operating income ÷ Revenue

Source: AppFolio 10-Ks. Includes SBC and all GAAP operating expenses.

SMA 20 - 249.96

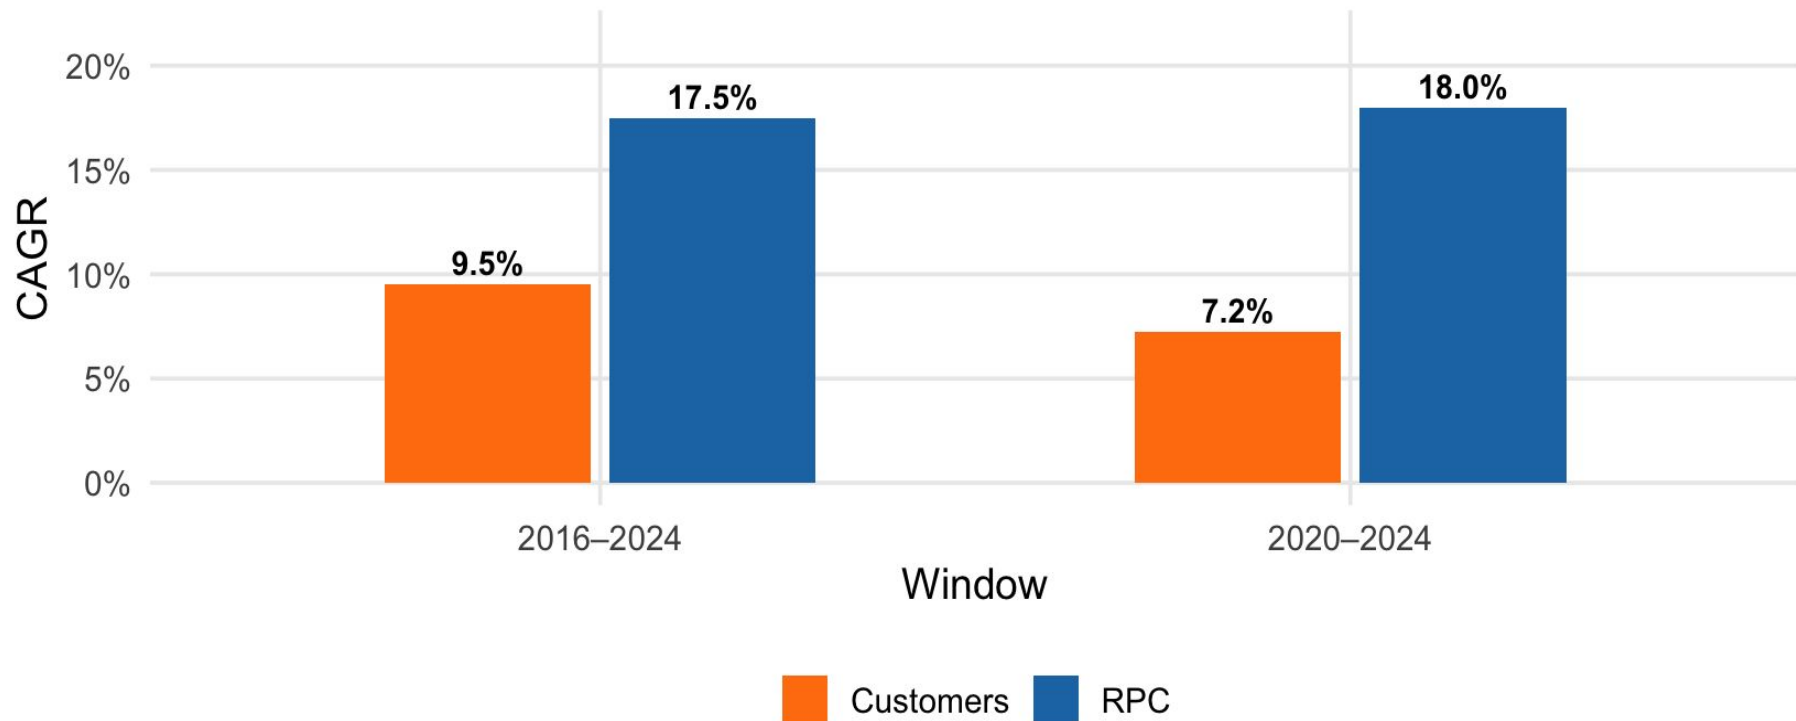

SMA 50 - 237.24

SMA 200 - 177.96

CAGR Comparison: RPC vs. Customer Count

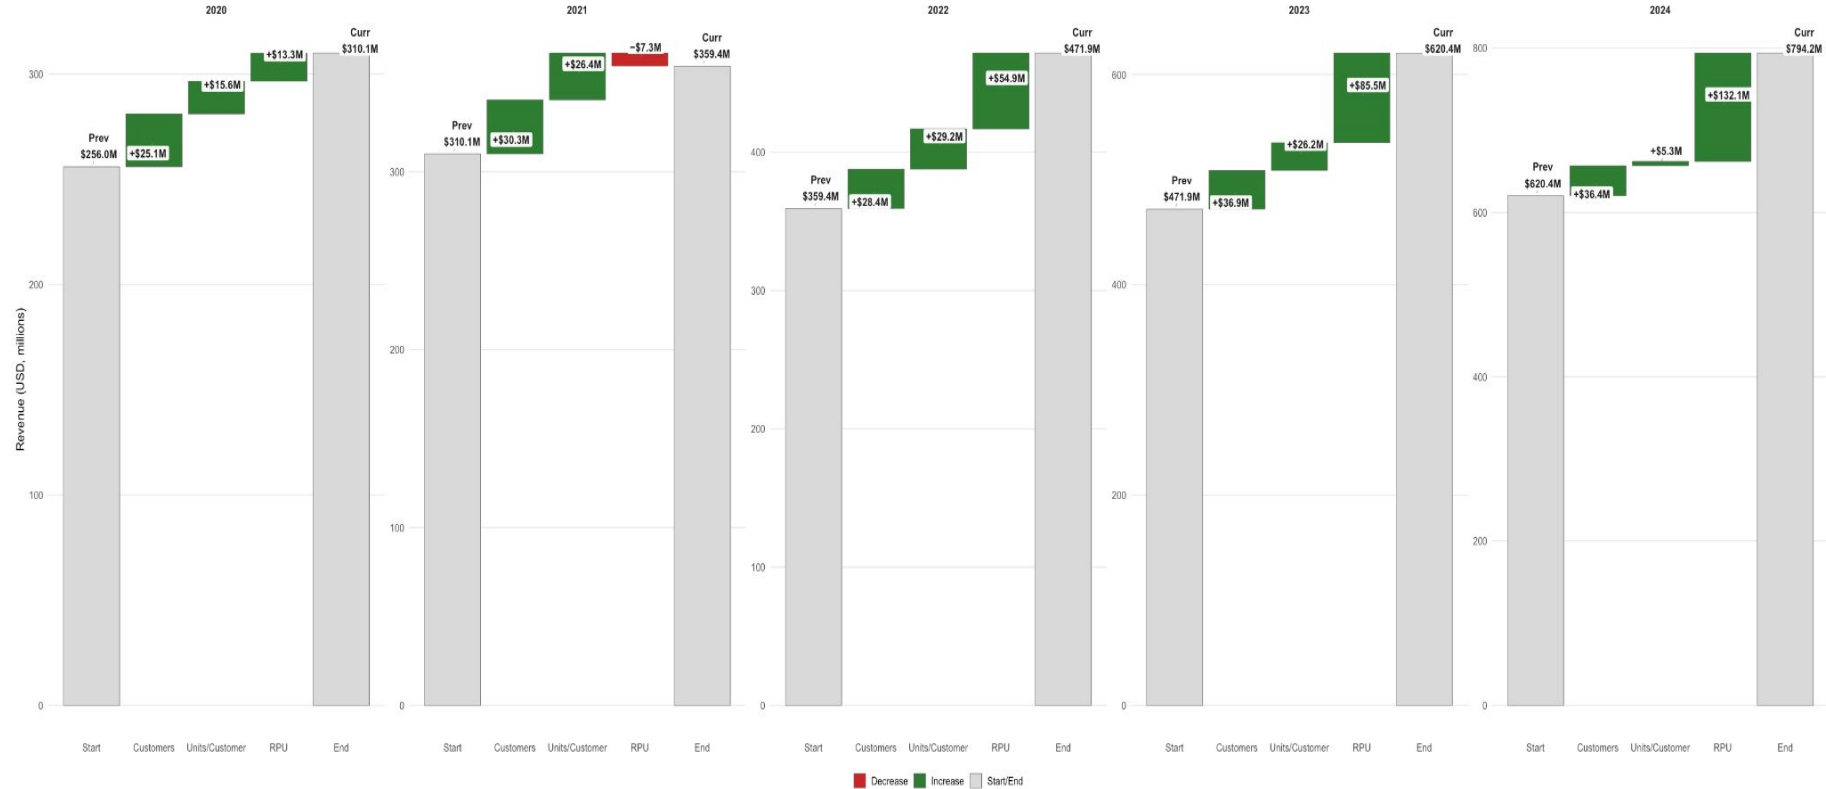

Contract size growth (RPC) materially outpaces logo growth

Source: AppFolio 10-Ks (2016-2024).

AppFolio Revenue Decomposition (YoY): Customers vs Units/Customer vs RPU

Waterfall from prior-year revenue to current-year revenue (USD millions)

Drivers: Customers (logo adds), Units/Customer (portfolio size), RPU (monetization per unit, price/tier/VAS).

AppFolio S&M% and G&A% of Revenue (2016–2024)

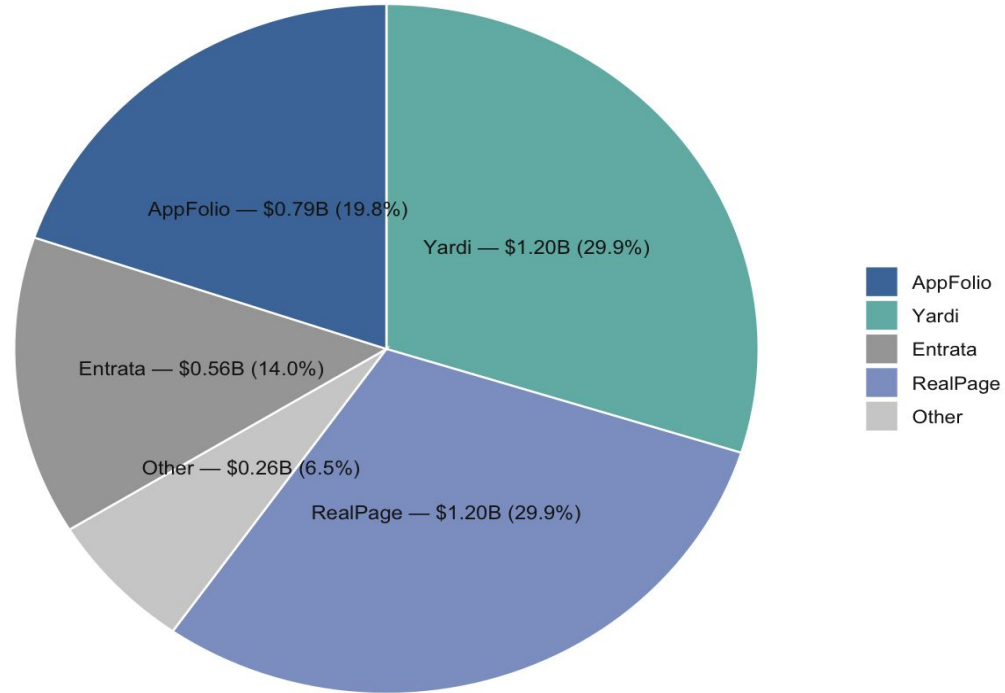

Overhead peaked during 2022's build-out,

Source: AppFolio 10-Ks (Operating expenses by line item).

Residential Property Management Software (Core SaaS TAM)

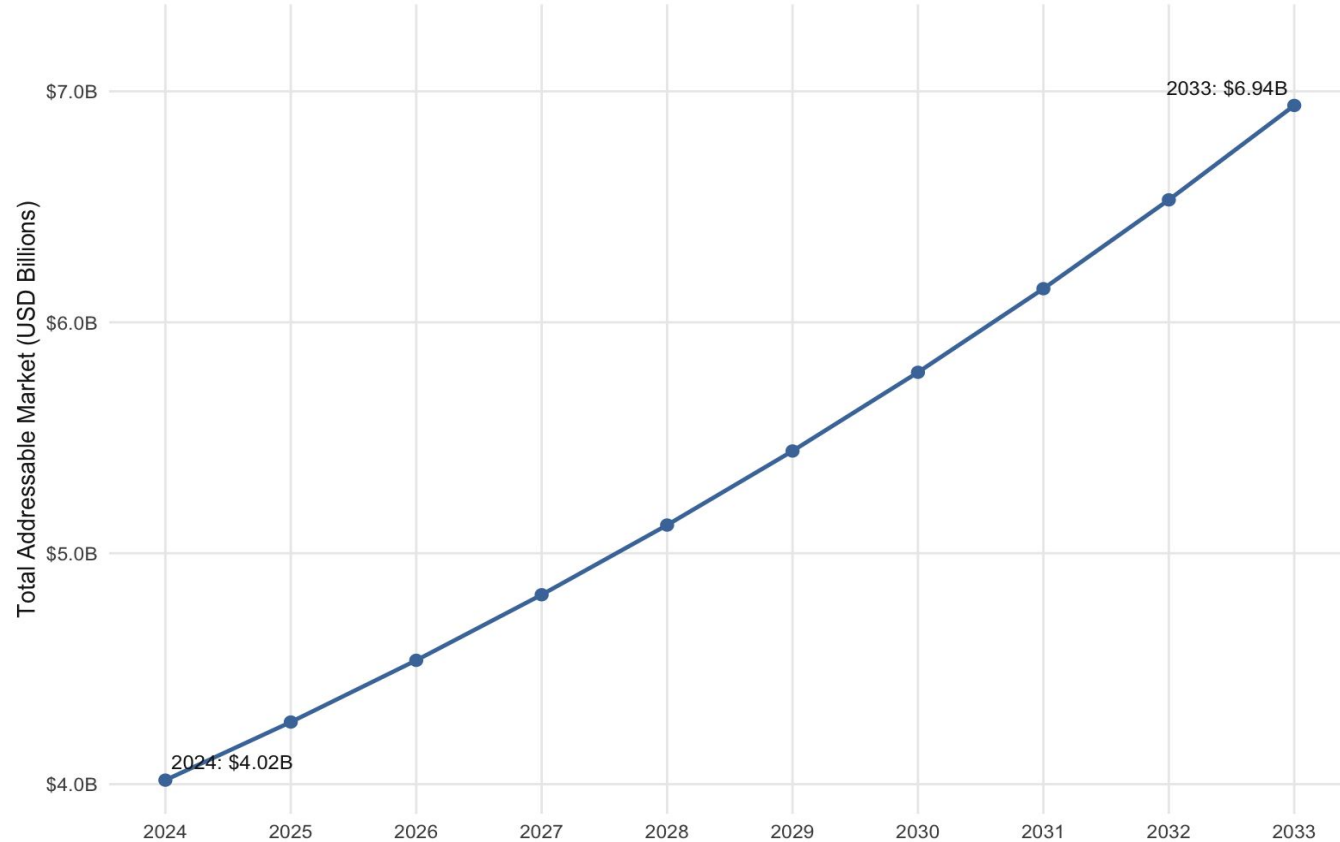

TAM (2024) = \$4.02B • CAGR = 6.3% • Sums to 100% and includes other

Sources: IMARC & Grand View Research. Blended TAM and CAGR derived from these.

Residential Property Management Software (Core SaaS TAM) — Projection

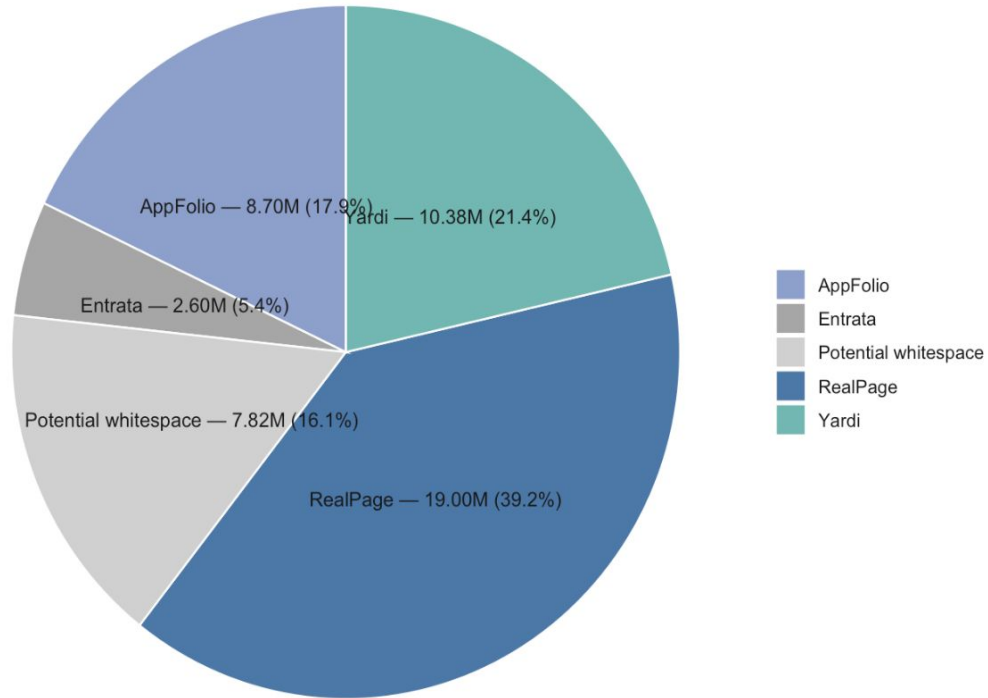

Base TAM (2024) $\approx$ \$4.02B • CAGR = 6.3% • Interval: 2024–2033

Sources: IMARC & Grand View Research. Blended TAM and CAGR derived from these.

U.S. Rental Units Under Management by Platform — whitespace calculation

Pie sums to 100% of U.S. rental units (48.5M total).

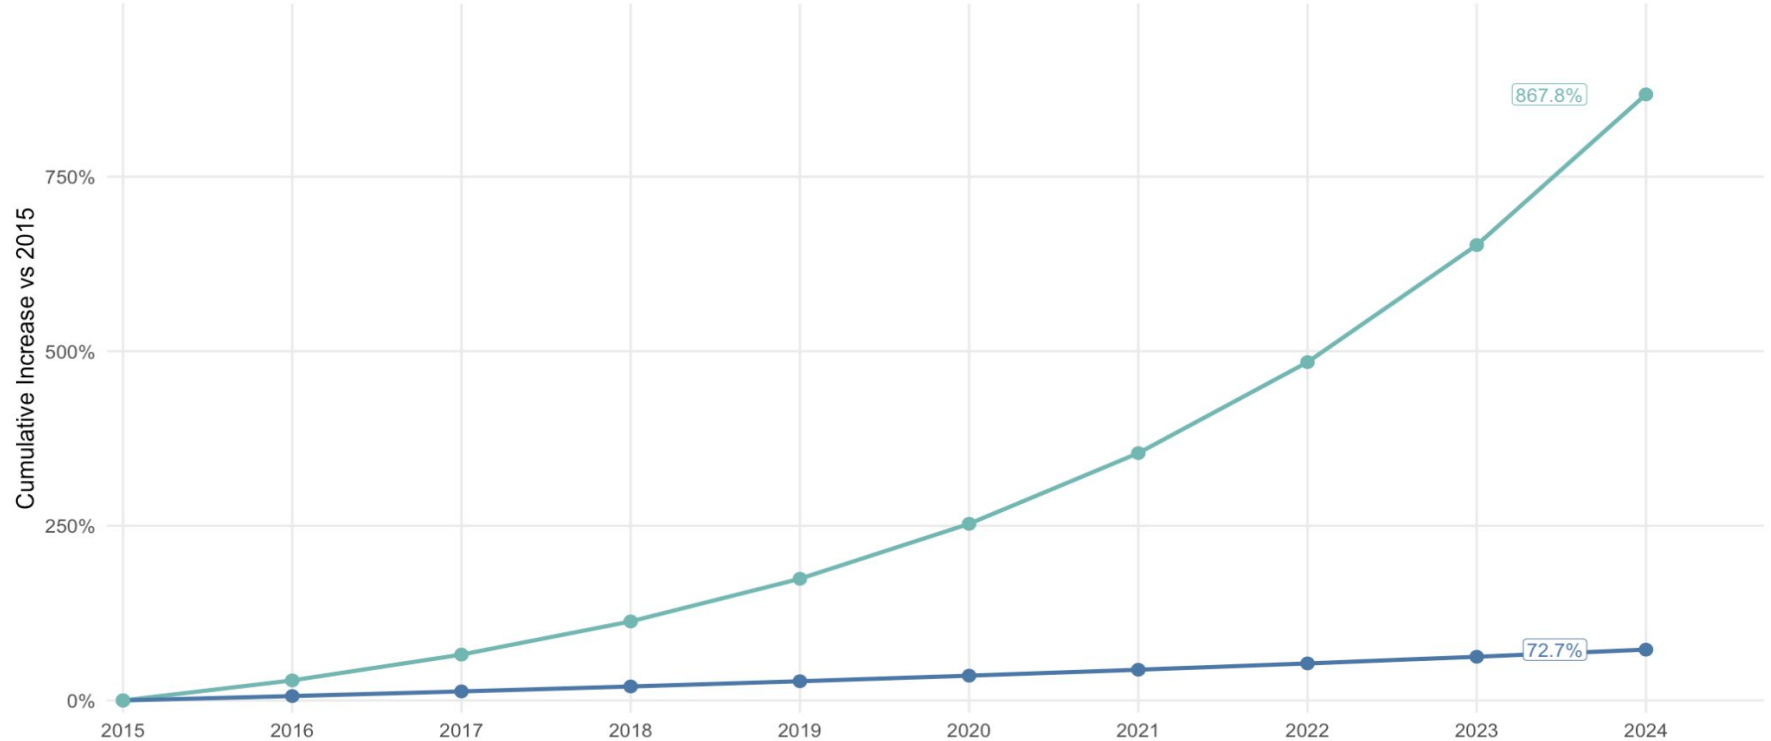

Indexed Growth vs 2015 (2015 = 0% increase)

Each series shows $(1 + \text{CAGR})^t$ where $t = \text{Year} - 2015$.

Assumption: AppFolio CAGR inferred from 2016–2024 holds back to 2015.

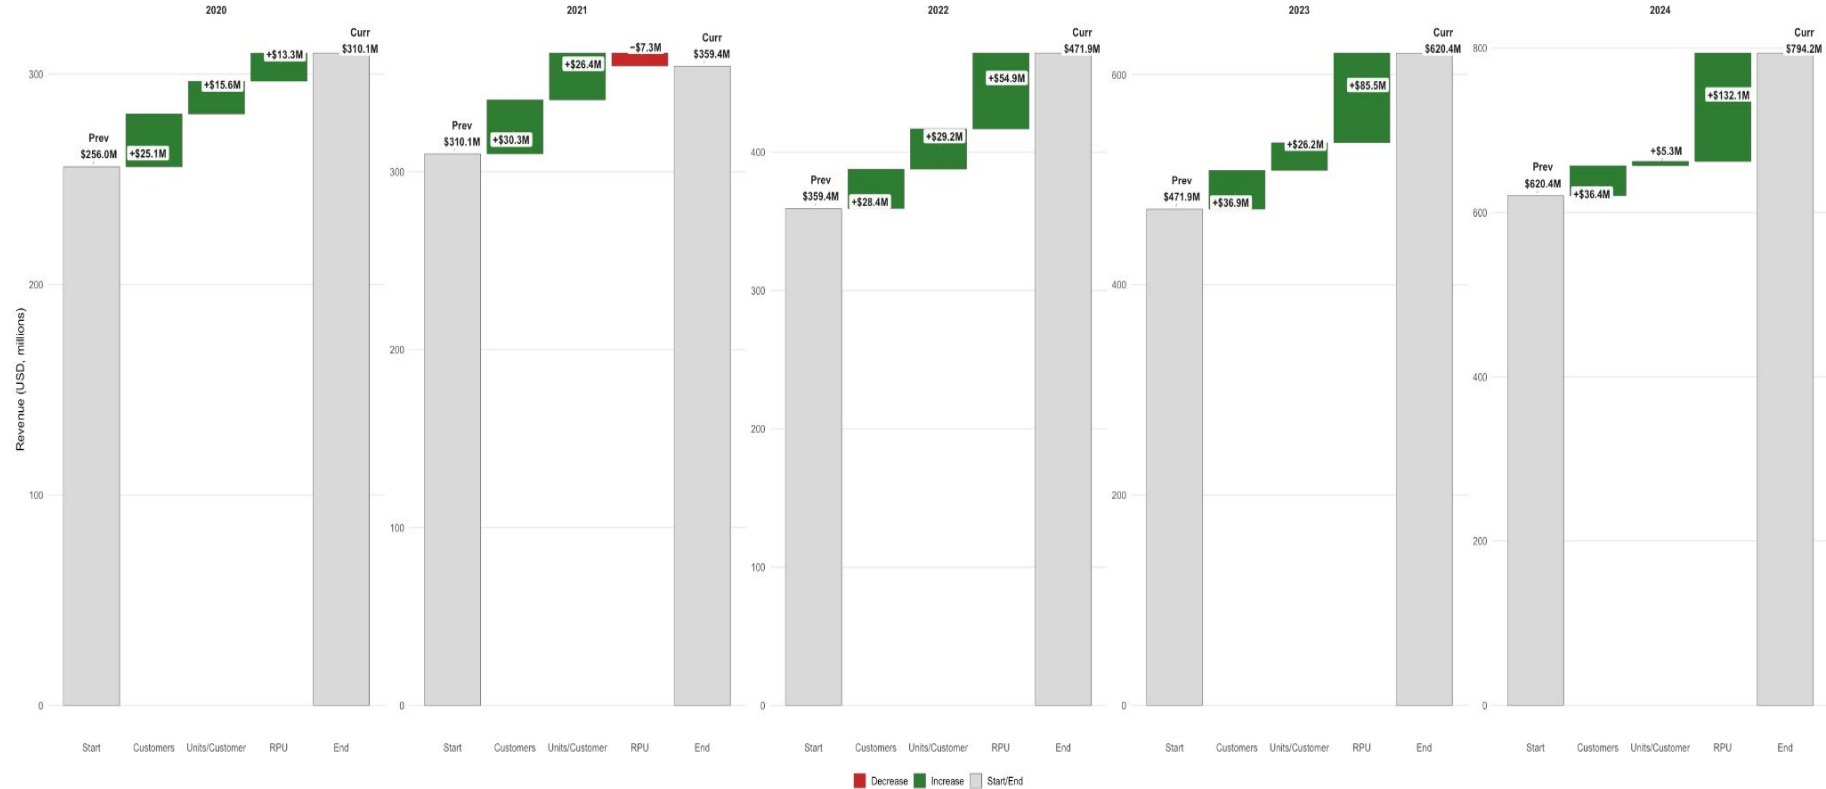

AppFolio path (CAGR from 2016–2024; assumed constant since 2015) Blended TAM path (6.26% CAGR)

Sources: IMARC & Grand View Research (TAM CAGR). Revenue sourced from 10-ks

AppFolio Revenue Decomposition (YoY): Customers vs Units/Customer vs RPU

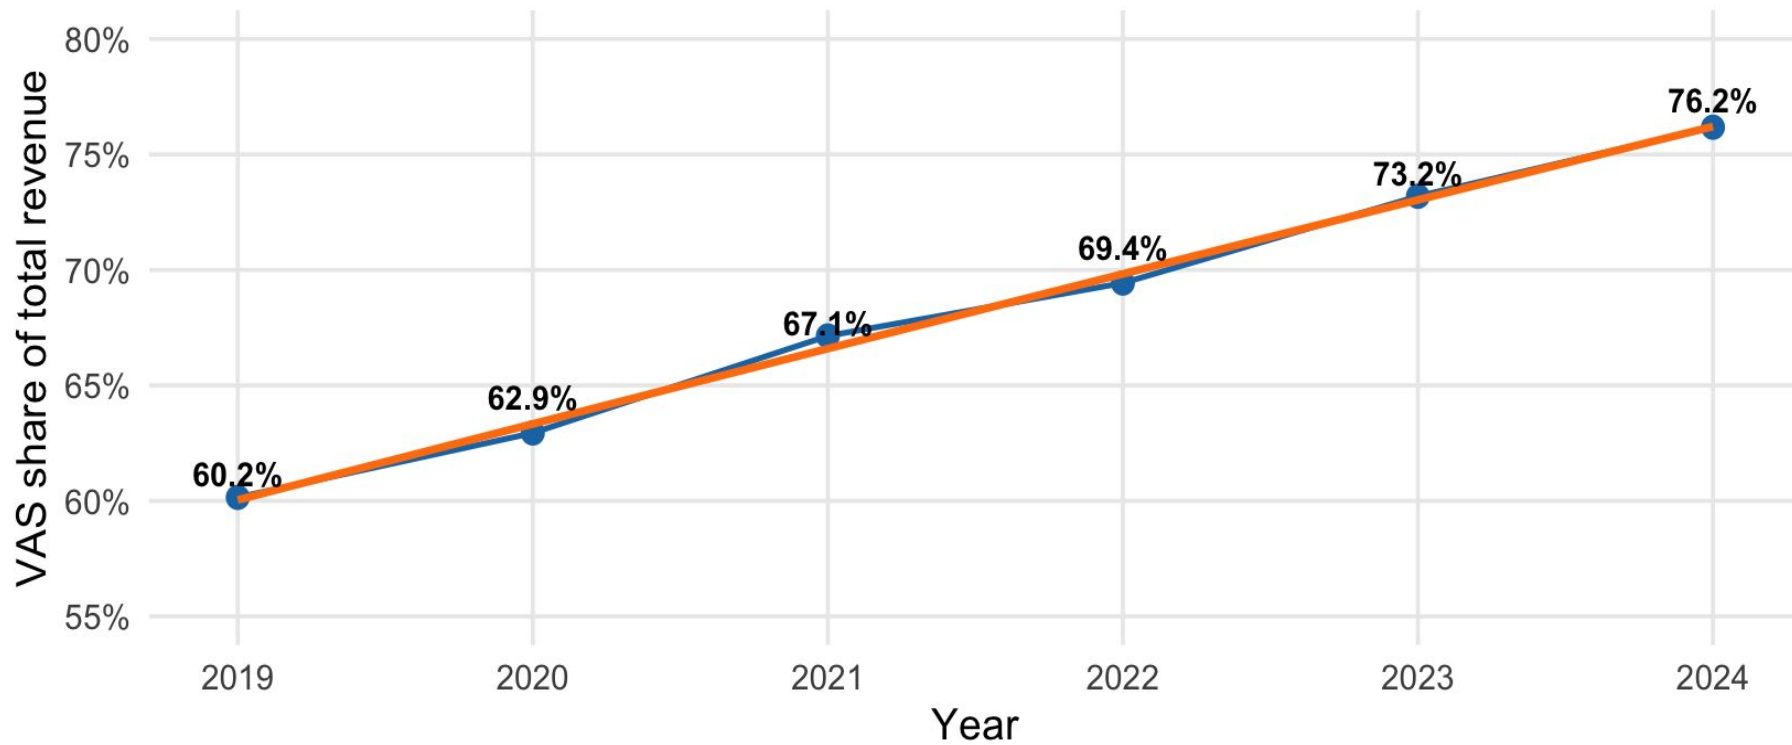

Waterfall from prior-year revenue to current-year revenue (USD millions)

Drivers: Customers (logo adds), Units/Customer (portfolio size), RPU (monetization per unit, price/tier/VAS).

Value Added Services as % of Total Revenue

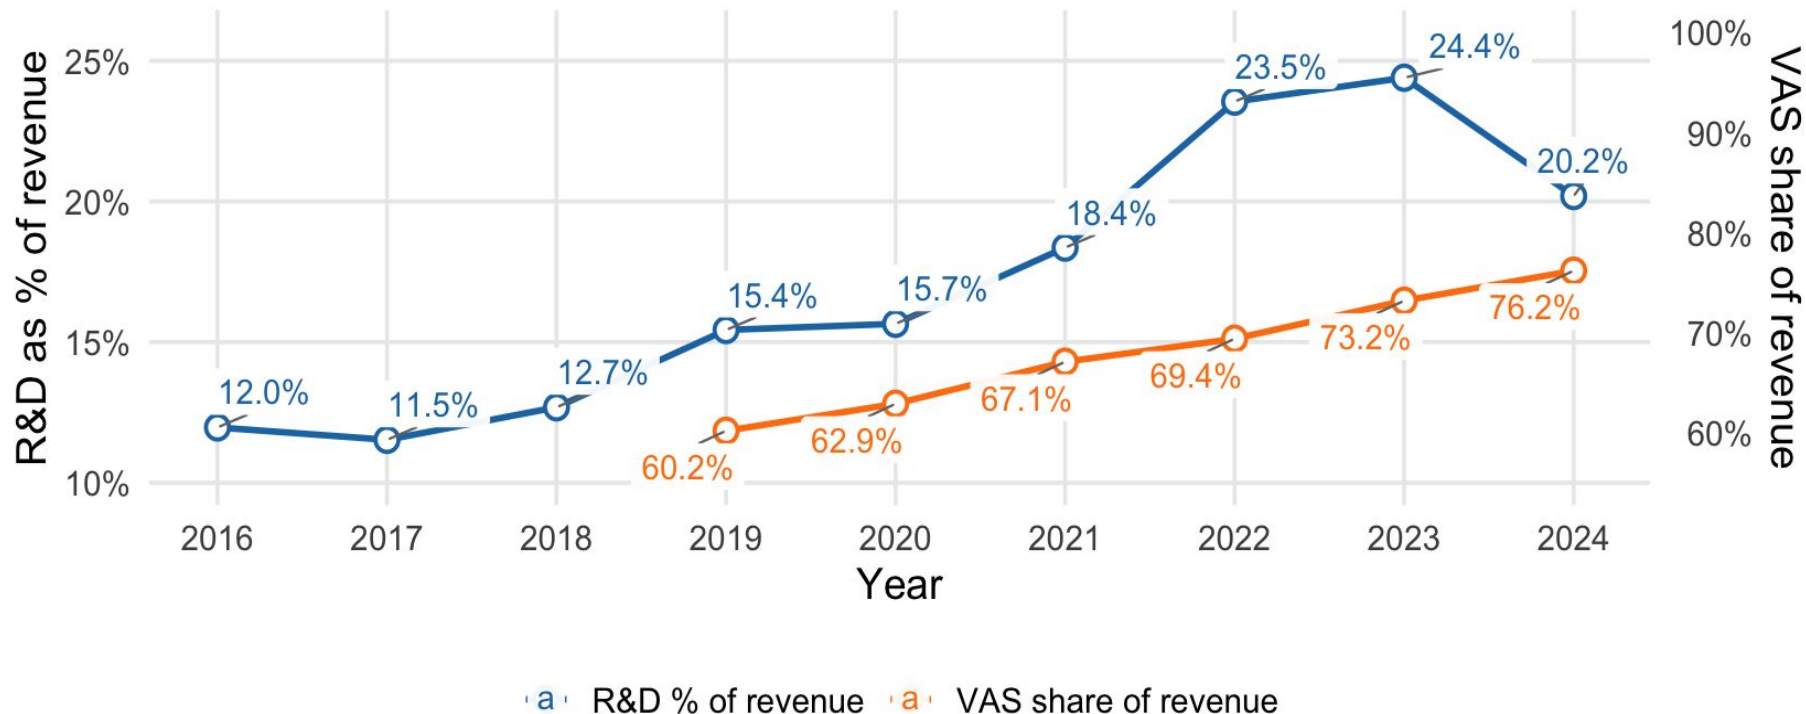

Exponential regression curve

Source: AppFolio 10-K filings, 2019–2024

AppFolio R&D Intensity vs. VAS Share

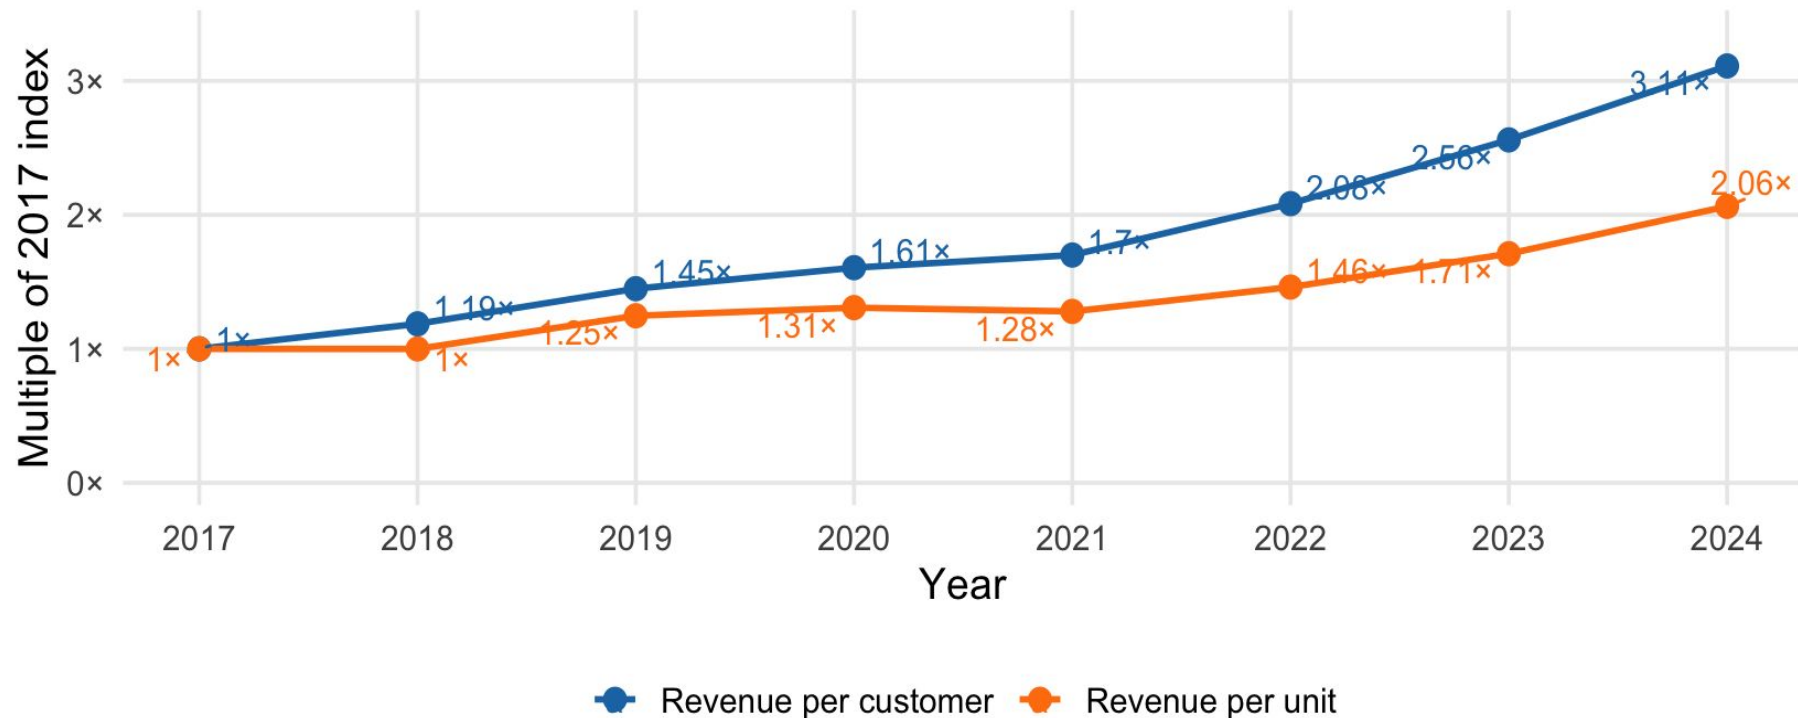

R&D (2016–2024) and VAS share (2019–2024); dual axis

Source: AppFolio 10-Ks & FY2024 release; ratios include SBC in operating lines.

Revenue per Customer vs Revenue per Unit (Indexed to 2017 = 1.0)

Comparing contract-size growth vs per-unit monetization

Sources: AppFolio 10-Ks (revenue, customers) and earnings releases (units).
